The Talent Behind the Technology

INNOVATIVE

The Traveling Solution Center (TSC) is a new approach to bringing technology to the customer. At SIS, we understand that the demands of running a business leave you little time for seminars, travel, etc.

As a result, to meet the needs of challenging schedules, we realized that we needed to alter our communication efforts, thus, the TSC road show was born.

Clients have told us they rely on our staff to keep them abreast of the latest in IBM Hardware and Software Solutions. Our "Technology Accelerator" travels across the country to deliver information right to our customers' door steps.

LOCATION LOCATION LOCATION

The constant advances in technology certainly make our lives easier but how do you choose which systems and software packages are right for you?

The SIS TSC will make your decision-making process easier by bringing the latest in IBM technology right to your door for hands-on demonstrations.

Get up close and personal with the SIS experts and let us show you how to take full advantage of the latest in IBM technology.

Our mobile briefing center is the latest and most convenient way to bring technology to you.

Are you interested in scheduling the technology accelerator to visit your location? If so, please visit www.ThinkSIS.com/tsc.jsp

UNPARALLELED EXCELLENCE

Currently, our road show will include the following hardware and software:

HARDWARE

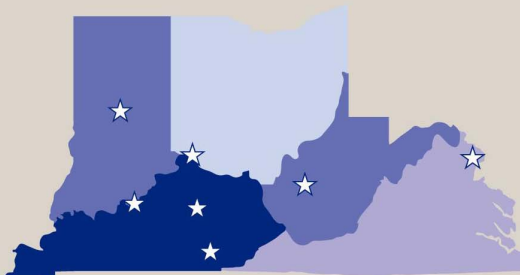

- ◆ xSeries family of servers
- ◆ Enterprise xArchitecture
- ◆ Server consolidation
