

Register now for  
**Information Security 101**

**Don't Get Caught With Your Firewall Down... and other common sense strategies**

Do you find the idea of securing your broadband network daunting? Do you frequently ask yourself "is my network as secure as it needs to be?" Then this is the workshop for you. This free four hour interactive workshop provides participants with the opportunity to learn how to preemptively protect an organization's computing assets from attack.

This workshop will be held on two dates in two locations:

**October 3, 2006**  
Advanced Knowledge Center  
118 East Danville Road  
South Hill, VA 23970

**October 19, 2006**  
Institute for Advanced Learning & Research  
150 Slayton Avenue  
Danville, VA 24540

---

Topics to be covered include:

- how to tell if you are a "sitting duck"
- common mistakes and how to avoid them
- security technologies and techniques including digital
