

# Security Basics

*Information Security 101 - "Don't Get Caught With Your Firewall Down", brought to you by Virginia's Center for Innovative Technology, is an interactive, hands-on workshop that will help you understand the jargon, acronyms, benefits and misconceptions about Network and Data Security. If you are a business owner, individual, or IT manager you cannot afford to miss this opportunity to learn how to effectively secure your organization's computing and network assets. Led by broadband strategist and implementation specialist Ron Perry, this lively discussion will take you through the basics of Information security from firewalls to acceptable use policies, and provides the tools necessary to determine where and how effective information security can benefit your home or organization.*

## Why should you attend?

Do You Find The Idea Of Securing Your Broadband Network Daunting? Do You Frequently Ask Yourself "Is My Network As Secure As It Needs To Be?" Then This Is The Workshop For You.

This Four Hour Interactive Workshop Provides Participants with the Opportunity to Learn How to Preemptively Protect an Organization's Computing Assets from Attack.

Topics To Be Covered Include:

- How To Tell If You Are A "Sitting Duck"
- Common Mistakes And How To Avoid Them
- Security Technologies And Techniques Including: Digital Certificates, Firewalls, Passwords, Virtual Private Networks, And Acceptable Use Policies
- Securing Your Assets Without Breaking The Bank
- How To Secure A Wireless Network
- Developing And Implementing Anti-Virus Strategies
- Why Aggressive Data Attacks Are Changing The Business And Social Landscape, And What It Means To You.

## Speaker Profile

### Ron Perry

A Virginia native, Ron has a broad background in the research and development of technology including telecommunications and entrepreneurship. Ron has a wide range of technology related experience including broadband architecture design and strategy, technology strategy, media production and web development.

Prior to starting his current company and joining CIT, Ron was the Manager of Technology Innovation for NTELOS where he created and managed the Internet business unit, later overseeing the engineering and technical development of data products as the Manager of Technology Innovation.

Ron is informally known as the Shenandoah Valley's "Mad Scientist". He currently serves as the Technology Chair and Vice Chair on the Board of Directors of the Wildlife Center of Virginia which was awarded a 2004 Computerworld Honors 21<sup>st</sup> Century Achievement Award.
