Hot, Flat and Crowded; Friedman's Smart Black Box is here today, not 20 E.C.E.

Jeff Ebihara, [Consert, Inc.](#) will discuss how Friedman's vision in his book is being deployed today and how North Carolina's Research Triangle Park might just become the hotbed for "Smart Grid".

Consert, Inc., based in Raleigh, NC, provides a market-driven, incentive-based solution to utilities, residences and small businesses by which they can conserve energy, save money, eliminate the need for new construction of peak-consumption generator facilities and begin the transition to alternative, renewable energy sources. In addition to a patent-pending method to locate, measure, aggregate and verify carbon savings, a Consert smart grid can report and manage alternative energy sources which facilitates the installation of solar and wind generators as well as the adoption of plug-in hybrid vehicles.

There is no fee to attend.

The restaurant's lunch buffet is approximately \$10.50 including beverage & tip.

Like many other civic clubs, we plan to hold the meetings on a regular monthly basis (2nd Tuesdays). Monthly meetings will be limited to 1 hour to allow attendees to get back to work in a timely manner. We will follow a format similar to other civic clubs in that the meal will begin when you arrive and continue through the lunch hour. Because we will eat from the buffet, a late arrival will not disrupt the meeting.
